# Reversible windows

– reinvented by Eurocell

## The new concept in easy-clean tilting window systems

Eurocell has developed a new concept in tilting window systems. Our reinvented reversible window design allows the sash to slide and tilt through 180° to facilitate safe and easy cleaning from within the home. Crucially, unlike similar pivot or tilt-and-turn windows, the sash reverses completely outside the building line, so there is no disruption to curtains, blinds or ornaments on the window cill.

## Rise to the challenge of multi-storey window installation

Providing cost-effective, secure and low-maintenance windows for multi-storey buildings is a challenge for all specifiers and fabricators working on public-sector housing developments, as well as private-sector residential and commercial projects. Windows located above ground-floor level need to be easy to clean from within the building, as well as safe for children and secure against break-ins.

The reversible window system from Eurocell fulfils all of these criteria.

## Maximum ventilation and child safety

As well as allowing both sides of the window to be cleaned from inside the building, the 180° reverse action offers maximum ventilation. For homes with young children, the window features child-safety catches which restrict the aperture so that children cannot fall through, while still allowing a high level of ventilation.

## High-security design for complete peace of mind

The robust design offers excellent protection against break-ins. Internally glazed units mean that the glass cannot be removed from outside to gain entry. Integral night ventilators also allow occupants to keep the interior fresh and comfortable at all times, while minimising the risk of break-ins through windows left ajar overnight.

Quality engineered for durability - in the most exposed locations

Manufactured to the highest standards, the window system's quality-engineered slider tracks, hinges and locking mechanisms deliver smooth operation for the life of the window. Our reversible windows have been designed for durability, long-life performance and are severe-weather rated - capable of withstanding harsh weather conditions in exposed high-rise locations.

## Enhanced thermal efficiency and aesthetics

With its fully bevelled frame and sash, the reversible window system offers enhanced sight lines and admits maximum levels of natural light into the building. The profile has a multi-chamber cross section for enhanced thermal efficiency – minimising heat loss through the window frame.

# Unique easy-clean design

– ideal for multi-storey buildings

## Choose a style to suit your building

Eurocell reversible windows are available in a wide range of combinations and colour options to suit any building. The unique transom/mullion section allows reversible sashes or reversible and fixed panes to be manufactured in the same frame. Other combinations, including 90° bay windows, variable-angled bays, and coupled frames are also available.

The standard colours available for reversible windows are White, Golden Oak, Rosewood and Mahogany. A huge range of other colours and woodgrain finishes are also available on special order.

## Perfect for replacement projects

Reversible windows are ideal for replacement window projects too. The 70mm front-to-back dimension matches the dimensions of old timber window frames. This means no adjustments to plaster lines for a seamless finish when replacing timber frames with Eurocell reversible windows.

# Why choose Eurocell?

The UK's PVC-U specialists

- ✓ Unique colour-match promise - we are the only manufacturer to guarantee an exact colour match across our full range of window, door and roofline products
- ✓ Guaranteed delivery within 48 hours available
- ✓ Products specially designed for ease of fabrication and fitting - improving your productivity
- ✓ Widest product range of any PVC-U systems supplier in the UK
- ✓ 10-year profiles guarantee assures you of high quality
- ✓ ISO14001 environmental management system accreditation
- ✓ Products manufactured from up to 100% recycled material

## The UK's leading PVC-U specialists

As the UK's market-leading manufacturer and distributor of quality PVC-U profiles, Eurocell offers precision-manufactured products and a complete one-stop-shop range for new-build and replacement projects.

### Sustainable standard

To support our ongoing commitment to sustainability, Eurocell has achieved the ISO14001 environmental quality standard.

# Features and benefits

– seven great reasons

All together better

- ✓ Hassle-free, safe cleaning from within the building
- ✓ Best-value solution for large-scale housing projects
- ✓ High-security design to prevent break-ins
- ✓ Child-safe features to prevent accidents
- ✓ Exceptional, safe ventilation for a fresh interior all year round
- ✓ Quality engineered for long-life and durability in all weather conditions
- ✓ Available in a range of styles, colours and woodgrain finishes

*All together better*
